

1

Data visualization:

The Wiss Data Analytics team turns your data into valuable insights. We use different software based on your business needs to visualize abstract numbers into meaningful charts, metrics, and tables.

2

Data processing automation

We accelerate your workflow by automating repetitive processes and minimizing human error. As your data grows and scales, we will support you with customized Excel templates and functions and reduce your costs with a thorough financial audit.

3

PDF Conversion

We transform sensitive PDF documents like bank statements, insurance paperwork and more into data that's clean, properly formatted and easy to interpret.

4

Data Management

We'll oversee your data migration, build secure and fast data connections, create a data warehouse, and help transform your data to your warehouse's specifications.
