

The Power Behind Power BI

Your data is the best resource to help you and your company discover insights and make decisions.

How It Works

We leverage Power BI along with our expertise in data management and data analytics to enable your company to manage by the numbers. We use different software based on your business needs to visualize abstract numbers into meaningful charts, metrics, and tables. You will understand and discover the trends, opportunities, and risks for your organization.

Customized reports and dashboards including Profit & Loss, Balance Sheets, Cash Flows and more

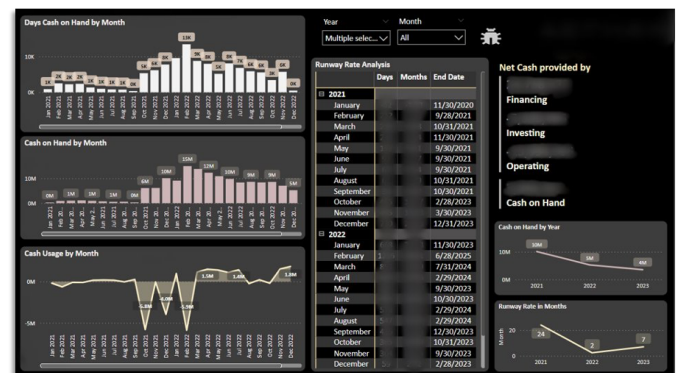

Dynamic and interactive visuals that show key metrics, market standards, and what-if analysis

Automated data preparation and consolidation on the backend

Ability to identify and flag suspicious accounts and activities in your data

Reach out to Wiss Data Analytics Team for a custom Power BI dashboard for your business!
